

Shooting Booth Swing-Out Barrier
Model SBB1200

TECHNICAL DATA

AT A GLANCE

- *Mid-Booth shooting barrier with skeleton front for low weight*
- *Provides excellent cover shooting practice with either hand*
- *Constructed of wood composite to prevent damage to guns*
- *Easy swing-out action with gravity locking detent*

DESCRIPTION:

The Touch Plus™ Swing-Out Barrier provides the means to practise shooting from behind cover. The barrier is set up mid-booth so that shots can be made from either side, ideal for strong hand/weak hand training. It is made of wood composite to prevent damage to guns in case of impact during practice. Easy swing-out action combines with a gravity-locking mechanism to make barrier manipulation simple and secure.

SIZE:

27.00"W x 2.87"TH x 75.89"H

WEIGHT:

42 lbs

FINISH:

Pebbled Black Powder Coat

Shooting Booth Swing-Out Barrier
Model SBB1200

ARCHITECTS' & ENGINEERS' SPECS

The Shooting Booth Barrier shall be an accessory to the Touch Plus™ series of Shooting Booths. The purpose of the barrier shall be to provide a means of practicing shooting from behind cover. The barrier assembly shall mount to either style of Touch Plus™ Shooting Booth (SBI1000 or SBC1000). The mechanics of the barrier hinge shall be such that the barrier will come to a secure rest position perpendicular to the Shooting Booth divider.
